Job Description

We are looking for highly motivated Data Solutions Associate Interns to join our dynamic team. This internship offers a unique opportunity to work on real-world data engineering, analytics, and AI/ML projects for Fortune 100 clients across industries such as Hi-tech, Healthcare, Retail, and SaaS.

As a Data Solutions Associate Intern, you will:

- Collaborate with cross-functional teams to understand client business challenges and translate them into data-driven solutions.
- Assist in designing and implementing data analytics solutions, data pipelines, and analytics dashboards
- Support the development and deployment of scalable data solutions using modern cloud platforms and tools.
- Participate in agile ceremonies such as daily standups and sprint planning to ensure timely delivery of project milestones.
- Work closely with senior engineers and analysts to continuously learn and contribute to high-impact projects.

This role is ideal for individuals who are passionate about data, eager to learn, and excited to work in a fast-paced, innovation-driven environment

Background

- Recently completed or in the final year of an undergraduate degree in a quantitative discipline such as Computer Science, Mathematics, or related fields from a top-tier institution. Familiarity with Generative AI concepts
- Basic understanding of data engineering concepts and familiarity with cloud platforms like AWS, Azure, or GCP is a plus.
- Familiarity with Generative AI concepts, and foundational models is preferred

Skills

- Strong problem-solving and analytical skills.
- Effective communication and interpersonal skills.
- Ability to work in a fast-paced environment and handle multiple projects simultaneously.
- Basic knowledge of SQL and data visualization tools is a plus.
- Familiarity with any programming languages such as Python, Java, or Scala.
- Willingness to learn and adapt to modern technologies and methodologies.
- Highly adaptable to change and a good team player with the ability to collaborate effectively.

The internship will be based out of Gurugram/Chennai Location.

The intern shall undergo performance evaluation at the end of the internship. Full-time employment offer may be extended to the intern basis his/her performance during the internship.
